FOR IMMEDIATE RELEASE

## CELTCORP RECENTLY SELECTED FOR SEVERAL NATIONAL PROJECTS

**Marlborough, MA March 12, 2008:** The Center for Educational Leadership and Technology (CELTCORP) has been retained by three prominent school districts - St. Lucie County in Florida, York Suburban in Pennsylvania, and Boulder Valley in Colorado - to provide an array of comprehensive technology planning services.

For both York Suburban School District and St. Lucie County Public Schools, CELTCORP is developing an Information Technology Blueprint aligned to the school district's vision, mission, goals, and budget. The major components detailed in the all-inclusive blueprint include curriculum and assessment; instructional technology; staff development; administrative computing; decision support systems; communications infrastructure; school facilities and retrofits; staffing and organization; standards, procurement and maintenance; policy and procedures; school/program planning; home/community access; and project implementation/management. The overarching goal is to increase student achievement, enhance staff productivity, and improve operational efficiency.

CELTCORP's Information Technology Blueprint was first developed in 1991 and validated by the United States Department of Education in 1994 and is updated twice a year. It is the most comprehensive planning model for technology research, planning, and implementation management available for use in both public and private schools.

Similarly, the Boulder Valley School District is implementing a long-term strategic plan focused on upgrading and enhancing their information technology infrastructure and technology support services. CELTCORP will work alongside Boulder Valley School District leadership and staff to assess the progress and effectiveness of their efforts to date via an Information Technology Performance Audit. The audit is focused on the seamless integration of technology into the curriculum, the quality and

timeliness of technical support at the school and classroom level, and the speed and reliability of its network infrastructure throughout the school district, at home, and within the community.

“With over sixteen years of experience, CELT is knowledgeable and adept at aligning contemporary educational reforms with the systemic use of technology for learning organizations, at all levels, in the U.S. and around the world. Our sole purpose in every engagement is to improve student performance through the effective and economical use of technology, and we are looking forward to meeting and exceeding these districts’ expectations relative to technology planning,” said Dr. John Phillipo, CELT’s Chief Executive Officer.

### **About CELT**

CELT helps K-12 leaders develop and implement IT strategies and systems that truly align technology with the core mission of today’s schools - achievement, accountability, and staff development.

Working with the vision, mission, and goals of educational organizations, CELT, a leading research, planning, and systems integration provider, assists with the implementation of technology in support of contemporary educational reform initiatives.

Through the implementation management of technology-based programs and services, CELT works collaboratively with educational organizations to not only support but also transform 21st century teaching, learning, and management. CELT helps public and private learning organizations at all levels with the identification, procurement, implementation, training, and integration of information products and services. This is accomplished by working cooperatively with the organization’s staff and community in conjunction with regional, national, and international information technology vendors.

CELT is one of the most comprehensive providers of research/planning programs, systems integration services, and customized decision support solutions.

CELT’s goal is to provide services of the highest quality, with a focus on student achievement, in the most timely, efficient and cost-effective ways possible using the latest information technology architecture. For more information, visit [www.celtcorp.com](http://www.celtcorp.com).
